DATAFLEX—ANTI STATIC / F LAME RETARDANT PVC STRIP CURTAINS FOR DATA CENTERS

Rayflex is the UK's premier manufacturer and market leader in the supply of Anti Static and/or Flame Retardant PVC strip curtain solutions to the Data Center and Clean Room industries.

High quality, extruded Anti Static and/or flame retardant PVC strip curtains provide a simple, cost effective, flexible and non intrusive solution for datacenter heat problems— substantial energy savings are achieved by effectively separating cold air aisles and hot air aisles and by controlling the direction of air-flow within the aisles.

All systems offer ease of installation and guarantees constant ease access to the servers.

Dataflex PVC strip curtains and suspension systems

SUBSTANTIAL ENERGY SAVINGS

Cold Air / Hot Air Aisles Containment, Directing Cool Air Where It Is Needed The Most—through The Computer Racks.
